Coventry Building
Society Arena
Coventry

*The UK's only independent exhibition, and conferences,
dedicated to healthcare technology*

2024 SPONSORSHIP OPPORTUNITIES

"The EBME Expo is always a wonderful event where we can network with potential partners, catch up with clients and obtain leads for future projects. Looking forward to 2024! Really well organised as always and a great event!"

Tanja Hundt, RFID Discovery

INTRODUCTION

The EBME Expo 2024 will once again be taking place at the CBS Arena. Even with the increased capacity the exhibition will sell out and we expect to be operating a waiting list by April. Taking this into account we have created a sponsorship brochure so that companies can take advantage of some of our exclusive sponsorship opportunities onsite at this year's event, not to mention some of our digital offerings also.

Please have a look through the opportunities below and contact the team should you wish to discuss offerings further. We look forward to hearing from you!

EBME EXPO – SPONSORSHIP PACKAGES

The tiered sponsorship packages are designed as a guide only and can be customised to meet the exact requirement of the sponsor. Your relevant account manager will be able to discuss options in more detail with you, adding and removing elements to the package to ensure that you receive the package that your business requires.

WEBINAR

A webinar will enable you to host an online presentation to a captured audience of clinical engineers and EBME managers. The webinar will be hosted using the zoom platform, and the package will consist of the below;

Key Health Solutions/BC Group Webinar – Ultrasound Transducer Safety and Patient Monitor Testing

Join the upcoming webinar for free

Key|Health Solutions

Topic:

Ultrasound Transducer Safety and Patient Monitor Testing

When:

Wednesday 20th September, 1pm

Synopsis:

Overview of Ultrasound transducer safety testing using the ULT-2020 and Patient Monitor testing using the SA-2600 and NIBP-1040. We will discuss the need and test method for testing ultrasound transducer testing and provide a demonstration for safety and performance testing of a patient monitor.

Speaker:

Lucio Simoni holds a master's degree in computer engineering and is the Vice President and BC Group's engineering business leader for nearly 30 years. He has led the design and development teams for almost every BC Biomedical production that bears the BC Logo. Lucio's key role is to continue to drive results by designing top quality test equipment for Biomed in a demanding marketplace
